

How to care for Titanium Vessel

How to care for Titanium Vessel

If the beautiful titanium color get dirty, You can clean with simple care.

If the color becomes dull ...

- ① Whisk neutral detergent for tableware with a soft sponge.
- ② Gently wash the titanium vessel and rinse it well with hot water.
- ③ Quickly wipe off the water and dry.

If you are still worried about dirt ...

- ① Prepare hot water at 40 ~ 50 °C.
 - ② Add an appropriate amount of liquid bleach for kitchen and neutral detergent to hot water and mix.
 - ③ Add titanium vessel, leave it for about 5 minutes, and rinse well with hot water.
 - ④ Quickly wipe off the water and dry.
 - * Do not use powdered bleach
 - * Be sure to ventilate
- ⚠ Do not leave it wet as it may cause water stains.
Be sure to wipe off the water and dry it.

Handling Precautions

The beautiful titanium color emits various colors by controlling the thickness of the ultra-thin transparent film on the surface in nano units. Titanium itself is durable, but please handle it gently.

- ◇ Do not attach tape or stickers. The color may getting off.
- ◇ Do not place near fire. The vessel becomes hot and dangerous.
- ◇ Please refrain from cleaning with a detergent containing abrasives or scrubbing brush as the color may getting off due to friction.
- ◇ Titanium is not broken, but strong impact may cause deformation or damage.
